Concentric Ring Probe

Use the SCS Concentric Ring Probe to test the surface and volume resistance of ESD bags per test method ANSI/ESD STM11.11 and STM11.12.

**770007 Concentric Ring Probe**

Measures surface resistance per ANSI/ESD STM11.11 and volume resistance per ANSI/ESD STM11.12 of planar material.

Maintains consistent contact between the fixture's conductive rings and the material under test.

Compatible with the following SCS Surface Resistance Meters:

- **701** Analog Surface Resistance Megohmmeter Kit
- **701-M** Analog Surface Resistance Megohmmeter
- **SRMETER2** Surface Resistance Meter
